

Bathroom Renovation Cost Estimator

This website provides a user-friendly tool for estimating bathroom renovation costs. It offers an interactive interface where users can input their bathroom details and receive a cost breakdown for their renovation project.

Key Features

- **Cost Estimation:** Calculate renovation costs based on bathroom type, size, and additional features
- **Interactive Form:** Input bathroom details and see real-time cost updates.
- **Cost Breakdown Table:** View a detailed breakdown of estimated costs for different items
- **Smooth Navigation:** Easy navigation between different sections of the website
- **Feature Selection:** Choose additional features like eco-friendly materials, heated flooring, and smart shower systems
- **Data Persistence:** Save user inputs locally for convenience

Technical Details

- Built with vanilla JavaScript for DOM manipulation and interactivity
- Utilizes local storage for saving user preferences and inputs
- Implements form validation for email, phone number, and bathroom size inputs
- Responsive design with custom styling using CSS variables

Usage

Users are able to:

1. Navigate through different sections using the menu.
2. Input bathroom details in the estimator form.
3. View and interact with the cost breakdown table.
4. Select additional features for their renovation project.
5. Save their inputs for future reference.

This tool aims to provide a quick and easy way for homeowners to get an initial estimate for their bathroom renovation projects.
